Technical skills

- HTML5
- CSS3
- Sass
- Javascript ES5/ES6
- React, Including hooks
- Redux
- MongoDB
- PostgreSQL

About me

I am currently studying Web development at the Digital Career institute.

Having worked as an IBM AS/400 analyst programmer for many years in many international companies large and small has given me a full and varied working experience.

I am keen to improve my current skill set and learn as much as possible on current web technologies.

I am a motivated and hardworking individual. Ready to except all challenges and progress further in this field. Coming from a programming background helps me to understand modern coding concepts and is a bonus for me in moving forward at a reasonably fast pace.

The main focus of the course apart from HTML, CSS and SASS will be JavaScript, Node.js, Express, MongoDB and React/Redux.

Professional Summary

German and Web development training

Professional Summary continued...

Permanent positions

June 2007 - June 2011
Analyst Programmer, The Disney Stores London
  My role at Disney consisted of maintenance and support of the core Island pacific software. Also, maintenance of the many satellite bespoke projects. My main role was to develop applications in support of the core systems. Languages used were RPG/400, AVR.NET (Visual RPG) and C#.

April 1988 - April 1995
Senior Analyst Programmer Videoprint London
  This role initially, was to setup and maintain the new IBM AS/400 systems. I progressed to senior Programmer.

June 1986 - April 1988
IBM Sys/38 operator English Heritage London
  This was my first position where I started as a junior operator.

May 1995 - April 2007
Freelance Analyst Programmer

Bourjois Ltd London
  This was a general-purpose role for the support and maintenance of the JBA package. I also worked on developing an in-house product tracking system.

Save the Children Fund London
  Support of in-house bespoke systems and the JBA package. Also developing interface programs to and from the JBA package.

L'Oreal Golden Ltd London
  Bespoke Sales systems support and maintenance. Also, developing conversion programs injecting mainframe data into SQL databases.

Digital Motion Ltd London
  Web applications, E-Commerce solutions development using Dreamweaver and Drumbeat 2000.

Web essential Ltd London
  General web development using HTML, CSS, and classic ASP.

Avidesa/Nestle (Valencia, Spain)
  Development of interface programs converting data to and from AS/400 systems to SAP systems.
